NEW LAWS FOR DRIVERS OF HUMAN MOTORS

Pull your machine up alongside a filling station regularly three times a day and put into it high-test fuel, such as leafy green vegetables, fresh fruit, milk, dark bread and real butter. Do not use substitutes—you wouldn't do it with a limousine. This high-test fuel is remarkable in that it builds your automobile as well as puts pep in your motor.

Run your human automobile into the garage each night for eight hours of rest. Remember to turn on the fan by opening windows and getting plenty of fresh air. This will prevent flat tires.

Run your automobile body onto the wash rack daily. Keep the chewing apparatus clean. Brush it morning and night.

Give your human car plenty of water to prevent a dry radiator.

Visit expert mechanics regularly (the doctor once a year and the dentist at least twice a year). They can help you overhaul your machine and discover a little knock in the engine before you even hear it.

Put a self-starter on your flesh-and-blood vehicle—that is, remember the main facts about putting pep in your motor every day.—*Illinois Medical Journal*.

MORBIDITY*

Diphtheria.

68 cases of diphtheria have been reported, as follows: Alameda County 2, Berkeley 3, Oakland 7, San Leandro 1, Contra

* From reports received October 21st and 22d for the week ending October 19th.

The dictates of common decency and cleanliness are the foundation stones of all hygiene and disease prevention. Most disease producing bacteria find their way out of the bodies of their victims in some of the body discharges. From the practical standpoint, then, the mechanical removal of bacteria from the person, quarters, and equipment is more desirable than an attempt to kill the germs with antiseptics without provision for removing them. For this purpose plenty of elbow grease, soap, and warm water have no equal.—Captain R. L. Laybourn, Sanitary Reserve in The Infantry Journal.

A sick man is not a good farmer nor is he a good judge of hogs, horses or cattle. He must be free from handicaps caused by physical suffering if his mental faculties are to function soundly.—*Florida Health Notes*.

Chicken pox and diphtheria showed increased prevalence last week.

Undulant fever is now reported regularly each week.

Smallpox is more prevalent than it should be.

While epidemic meningitis has become reduced in prevalence it does not fall as rapidly as might be desired.
